

List of Hatch Project and Study Activities that Mining Engineering Graduates/Students could be employed in:

- Project Studies
 - Concept
 - Pre Feasibility
 - Feasibility
 - Detailed Planning
- Underground & Open Cut Mine Studies
 - Strategic mine planning including pit optimisation
 - Conceptual and detailed mine planning, including detailed underground stope and development designs
 - Short and long term mine production scheduling
 - Rehabilitation design and closure planning
 - Financial modelling
 - Risk assessment
- Support services to mining operations
- Audits and Reviews (Consulting)
 - Technical Engineering Reviews
 - Project Audits

Commodities:

IRON ORE

COPPER

NICKEL

GOLD

ZINC

BAUXITE, ALUMINA, ALUMINIUM

URANIUM

DIAMONDS

COAL

MINERAL SANDS
